CONTENTS

Relation between bridging conformation and rheology of suspensions
Y. Otsubo (Chiba, Japan) 1
Flocculation/dispersion of suspensions by controlling adsorption and conformation of polymers and surfactants
P. Somasundaran and X. Yu (New York, NY, USA) 33
Temporal interaction of monodispersed microspheres evaluated from steady shear rheometry and onset of flow instability
M. Senna (Yokohama, Japan) 51
Electrostatic interaction between two spherical colloidal particles
H. Ohshima (Tokyo, Japan) 77
Rheological properties of silica suspensions in polymer solutions
M. Kawaguchi (Mie, Japan) 103
Retention behavior of colloidal dispersions in sedimentation field-flow fractionation
Y. Mori (Kyoto, Japan) 129
